Fine 2 Dine

Return to the essence of dining.

With this catalog, we aim to return to the essence of dining. We do this by showing multiple inspiring, qualitative but most of all pure products throughout the different pages. This can be seen in 2 ways: Fine2Dine offers pure tableware products that can reinforce the presentation of any dish. On the other hand we have the use of ingredients in their purest form. The idea is to inspire chefs from this point of view. We want to catch their attention and inspire their thoughts about the desired dish and the accompanying presentation. Without their creativity, an ingredient is nothing more than a suggestion. They have to use their inspiration to turn the ingredients into a successful recipe that separates a culinary experience from bland nourishment.

Reactive Glaze

Binded by similarity, distinguished by uniqueness.

Different pattern & difference
in color resulting in unique items.

Most of our ranges are finished by hand, using a reactive glaze. Thanks to this glazing process no two pieces are alike. Random patterns and colour differences will form, resulting in truly unique pieces that still refer to the same family and all items of that family will perfectly match together.

You can compare the effect of reactive glazes with snowflakes. No matter how many billions of them fall from the sky, there are never two alike. This is the case because every snowflake has its own unique pattern and there is an infinite number of possible shapes they can form.

The same counts for tableware finished with a reactive glaze. You'll never catch two exact copies, but within the same collection they'll all have something in common. In this catalog, all ranges that feature a reactive glaze are marked with the following symbol: ®

Arco

A glimpse of lost times.

Arco reflects the vigor of ancient fossils as the subtle ribbed shape on this range embodies the timelessness of majestic ammonites. Arco combines a matte, reactive glazed finish along with a slightly raised irregular rim for a unique touch. Above this, these reactive glazes and robust but elegant organic shapes bring an incomparable authenticity to your dinner table. Its desert flaxen color pattern is immensely versatile, making it your perfect companion for each setting.

Atlas

Elevates your dish

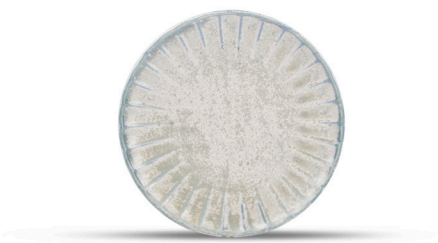

The world has been an incredible source of inspiration for the creation of this Atlas collection. It's durable porcelain tableware with clear references to natural elements such as blossoms, shell shapes, waves and other abstract structures that can be found in nature.

Each element is characterised by a well-shaped rounded rim that creates a refreshing culinary perception. Atlas literally elevates the food that is served on it.

The exceptional thing about Atlas is that no two items are precisely the same. The reactive glaze creates small imperfections that fit completely into the imperfect world it refers to.

Curvo Forest

Strong round and bulky shapes

The diversity of the human body and the social movement about body positivity have been an incredible source of inspiration for the creation of the Curvo collection. Just like the movement, Fine2Dine aims to challenge the established beauty standards. Instead of fine lines and elegant slim forms, Curvo features strong round and bulky shapes in combination with dark earthy colors. The sturdy porcelain tableware items will add a chunky flair to your table.
